

MARION COUNTY RABIES CLINICS 2004

During April, the South Carolina Department of Health and Environmental Control and Veterinarians in most counties across the state will join forces to help residents protect themselves and their pets from rabies.

Rabies is an incurable and fatal disease that is now epidemic in South Carolina. If the predictions of state officials come true, rabies will soon spread throughout the Pee Dee area and Marion County. We must take immediate action to prevent this from happening. You can help by having your pets vaccinated at the clinic nearest your home, and by encouraging your neighbors to do the same.

South Carolina law requires that a pet owner must have it inoculated against rabies at a frequency to provide continuous protection of the pet from rabies using a vaccine approved by the department and licensed by the United States Department of Agriculture—Veterinary Biologics Division. The owner of an unvaccinated dog or cat may be found guilty of a misdemeanor and fined up to \$500 or imprisoned for up to thirty (30) days.

MARION ANIMAL HOSPITAL, HWY. 76
